CT-22 CABLE TRAINER

Gaining muscular endurance.
Effectually burn calories and fat!

UNLIMITED RESISTANCE PROVIDED BY AIR

Pulling faster or slower by your own willingness to determine your resistance. Ramp up resistance automatically through pulling with greater speed and force. This cable trainer has been installed the pulley systems inside with a mechanical advantage to create higher resistance up to 400W.

GAS LIFT CYLINDERS FOR ARM LIFT SUPPORT FORCE 150N

When you try to lift the heavy swivel arm to adjust the angle, the gas lift cylinders could help you easily to move the arm even with just one finger. Our goal is to create an easy-to-use and safe machine to meet your comfortable exercise needs.

AIR RESISTANCE AND AERODYNAMICS

Air resistance from the fan in a workout intensity effectively increases calorie expenditure, benefits both aerobic and anaerobic systems development, and also contributes to a greater after-burn effect.

ANGLE ADJUSTABLE SWIVEL ARMS + ANKLE STRAP ACCESSORIES

Be engaged in a total-body workout. Adjustable arms provides a quick and easy way to set the most suitable angle for your own training! This cable trainer effectively works the core, shoulders, quads, hamstrings, glutes, and back muscles.
