

db3 folding e-bike

A practical, convenient and innovative solution to the traditional e-bike.
One and only.

Elegant and easy functional LCD console

High-tech central control system is easy to operate with built-in multi-functions.

Easy-folding

Integrated easy folding design, simply press down the button and rotate frames, the front section will then be paralleled to rear wheel, which minimizes the dimension for storage.

db3 has redefined 20" folding e-bikes with its sleek appearance, intelligent folding mechanism and powerful performance assistance.

SPEC.

db3

Dimension LxWxH	1510 x563 x1084 mm
Dimension (fold)	893 x290 x728 mm
Weight	25.3kg (including battery 2.3kg)
Wheel size	20" x1.95"
Frame	Mg-Al alloy
Brake	F/R Disc brake
Motor	36V 250W DC Brushless Mid-drive
Battery	36V 10Ah Lithium Battery
Charger	DC36V 2A
Display	LCD display
Sensor device	Torque sensor
Range	100km (ECO mode)

*Range may differ by using conditions such as riding modes, user weight, road conditions, weather, etc.

Modern frame design

Unique frame with one-piece rim made with Mg-Al alloy makes the weight lighter.

Creative single front fork & chain stay

Special single front fork & single chain stay frame design to minimize the folding dimension to be extremely compact and ultra-light.

Stylish one-piece rim

The simple one-piece rim subverts the image of ordinary rim with spokes and hub, making db3 be more neat and modern.

Powerful mid-drive motor

Mid-drive are the ultimate for high torque and high efficiency. Discover how the mid-drive technology is more powerful and efficient than other e-bike motors.

Lighter timing belt

Minimal noise produced, rust-proof, low maintenance and clean operation.

Ultra-light lithium battery

Unique folding mechanism as an integrated piece of the design – a focal point that adds visual value to the bike design.
