

db5 folding e-bike

Transcend your unlimited expectancy for folding bikes, experience the fun of riding with pleasure.

Foldable handlebar

Foldable handlebar minimizes the folding dimension to be extremely compact for storage or being carried.

Easy-folding

Integrated easy folding design, simply release the quick-lock and rotate frames, the front section will then be paralleled to rear wheel, which minimizes the dimension for storage.

db5 will bring you a new life style of health and sustainability.

SPEC.

Modern frame design

Unique frame with one-piece rim made with Mg-Al alloy makes the weight lighter.

Creative single front fork & chain stay

Special single front fork & single chain stay frame design to minimize the folding dimension to be extremely compact and ultra-light.

Stylish one-piece rim

The simple one-piece rim subverts the image of ordinary rim with spokes and hub, making db5 be more neat and modern.

Powerful mid-drive motor

Mid-drive are the ultimate for high torque and high efficiency. Discover how the mid-drive technology is more powerful and efficient than other e-bike motors.

Ultra-light lithium battery integrated with seat tube

Battery as an integrated piece of the seat tube design – a focal point that adds visual value to the bike design.

Elegant and easy functional LCD console

High-tech central control system is easy to operate with built-in multi-functions.
